How To Use This Logbook

Certifications are won in the **study sessions nobody sees**. This logbook turns vague intentions into a paper trail of real work: your goal, 100 logged study sessions, practice-exam scores with a visible trend, drill-downs for weak areas, and an exam-week battle plan.

How to work through it:

1. Goal page first. Write the certification name, exam date, and *why* — your why carries you through week 6.

2. Log every session. Date, hours, topic, practice score, and one honest note. Never skip the note.

3. Take 10 practice exams. Record every score on the tracker and watch the trend line of your progress.

4. Drill weak areas. Each weak topic gets its own worksheet until it stops being weak.

5. Execute exam week. Follow the 7-day plan, then run the exam-day checklist like a pilot.
