How To Use This Playbook

Work that wins work

Clients don't hire resumes — they hire proof. Your portfolio is that proof: the single most powerful asset in a freelancer's business. This playbook shows you how to build, present, and promote a portfolio that converts visitors into paying clients.

Whether you're a designer, writer, developer, marketer, photographer, or videographer, the principles are the same: curate ruthlessly, tell the story behind the work, and make contacting you effortless.

- **Part 1 — Strategy:** positioning, platforms, and what to show.
- **Part 2 — Case studies:** the anatomy of work that sells.
- **Part 3 — Presentation:** visuals, thumbnails, and polish.
- **Part 4 — Your story:** bio, about page, and services.
- **Part 5 — Traffic:** getting the right eyes on your work.
- **Part 6 — Conversion:** turning views into paid projects.

WHY IT WORKS: *Hiring research consistently shows that decision-makers spend under a minute on a first portfolio scan. Your portfolio has ~60 seconds to earn a deeper look. Every section of this playbook is built around that reality: hook fast, prove value, make contact easy.*
