How To Use This Workbook

Your unfair advantage, built

Being the best in the world at one thing is nearly impossible. But being in the top 25% at three complementary skills — and combining them — is very achievable. That combination is your skill stack, and it's what makes you rare and valuable.

This workbook walks you through it: audit what you already have, design powerful skill combinations, build a learning plan for the missing pieces, package the stack into offers and a resume that sells, and track your progress.

- **Part 1 — The Concept:** what a skill stack is and why combinations beat single skills.
- **Part 2 — Skill Audit:** inventory everything you know, including hidden and transferable skills.
- **Part 3 — Building Combos:** the 3-skill formula and proven combo archetypes.
- **Part 4 — Learning Plan:** choose what to learn next and build a 90-day sprint.
- **Part 5 — Proof & Portfolio:** prove each skill with real artifacts.
- **Part 6 — Packaging:** turn your stack into offers, pricing, and positioning.
- **Part 7 — Tracking:** weekly tracker and milestone map.
- **Part 8 — Case Studies:** real-style examples of stacks in action.

WHY IT WORKS: *You already have more of a stack than you think. Most people undervalue skills that feel 'easy' to them — but easy for you and rare in the market is exactly what a valuable stack is made of.*

Your turn:

My current job / situation:

Skills people already ask me for help with:

Income goal for my stack (monthly): $

Time I can invest weekly (hours):
